

Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Job Title:

Short Description: Scenario 1

- Automated systems control work processes, assign tasks, and continuously evaluate employee performance and productivity.
- Constant adaptation, high pressure to perform, and unstable roles characterize a workday that is consistently focused on efficiency.
- Leadership oversees, while the allocation of personnel and tasks increasingly follows automated guidelines.
- Leadership must maintain responsibility and the capacity for human agency, even though systemic guidelines dominate decisions, roles, and work rhythms.
