

Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Short Description: Scenario 2

- Technology is used strategically to conserve resources, streamline processes, and support reliable structures over the long term.
- Day-to-day operations are characterized by a long-term orientation, social responsibility, and a calm, reliable approach to work.
- Leadership strikes a balance between performance, environmental sustainability, and the needs of different social groups.
- Leadership must reconcile short-term efficiency requirements with long-term social and environmental responsibility.
