

Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Short Description: Scenario 3

- Technology makes information, decision-making processes, and responsibilities fully traceable and facilitates both internal and public oversight.
- Openness, personal responsibility, and accountability shape a culture in which actions can be questioned at any time.
- Leadership enables open communication and independent decision-making, even though mistakes and internal conflicts may become apparent.
- Leadership must maintain the ability to act and a willingness to take risks without restricting transparency, accountability, and legitimate public oversight.
