

Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Short Description: Scenario 4

- Technologies support the monitoring of scarce resources, their efficient allocation, and the maintenance of existing systems.
- Thrift, foresight, and clear priorities shape a disciplined yet tense organizational culture.
- Leadership determines which tasks, resources, and societal needs take priority under conditions of scarcity.
- Leadership must ensure supply and the ability to act, while at the same time justifying distribution decisions in a fair and transparent manner.
