

Questions of the Executive

1. To what extent does the use of the technology change the understanding of leadership and decision-making, possibly shifting it from humans toward systems?
2. What risks arise from the use of the technology, and who bears the responsibility for the consequences that result from it?
3. How do we ensure that the use of the technology adequately takes ethical, legal, and social implications (ELSI) into account?
4. How do we address potential tensions among our employees and stakeholders that may arise for social or cultural reasons?

Short Description: Scenario 2

- Technology is used strategically to conserve resources, streamline processes, and support reliable structures over the long term.
- Day-to-day operations are characterized by a long-term orientation, social responsibility, and a calm, reliable approach to work.
- Leadership strikes a balance between performance, environmental sustainability, and the needs of different social groups.
- Leadership must reconcile short-term efficiency requirements with long-term social and environmental responsibility.
