

Questions of the Executive

1. To what extent does the use of the technology change the understanding of leadership and decision-making, possibly shifting it from humans toward systems?
2. What risks arise from the use of the technology, and who bears the responsibility for the consequences that result from it?
3. How do we ensure that the use of the technology adequately takes ethical, legal, and social implications (ELSI) into account?
4. How do we address potential tensions among our employees and stakeholders that may arise for social or cultural reasons?

Short Description: Scenario 3

- Technology makes information, decision-making processes, and responsibilities fully traceable and facilitates both internal and public oversight.
- Openness, personal responsibility, and accountability shape a culture in which actions can be questioned at any time.
- Leadership enables open communication and independent decision-making, even though mistakes and internal conflicts may become apparent.
- Leadership must maintain the ability to act and a willingness to take risks without restricting transparency, accountability, and legitimate public oversight.
