

Questions of the Executive

1. To what extent does the use of the technology change the understanding of leadership and decision-making, possibly shifting it from humans toward systems?
2. What risks arise from the use of the technology, and who bears the responsibility for the consequences that result from it?
3. How do we ensure that the use of the technology adequately takes ethical, legal, and social implications (ELSI) into account?
4. How do we address potential tensions among our employees and stakeholders that may arise for social or cultural reasons?

Short Description: Scenario 4

- Technologies support the monitoring of scarce resources, their efficient allocation, and the maintenance of existing systems.
- Thrift, foresight, and clear priorities shape a disciplined yet tense organizational culture.
- Leadership determines which tasks, resources, and societal needs take priority under conditions of scarcity.
- Leadership must ensure supply and the ability to act, while at the same time justifying distribution decisions in a fair and transparent manner.
