

Questions of the Executive

1. To what extent does the use of the technology change the understanding of leadership and decision-making, possibly shifting it from humans toward systems?
2. What risks arise from the use of the technology, and who bears the responsibility for the consequences that result from it?
3. How do we ensure that the use of the technology adequately takes ethical, legal, and social implications (ELSI) into account?
4. How do we address potential tensions among our employees and stakeholders that may arise for social or cultural reasons?

Short Description: Scenario 6

- Technologies collect, disseminate, and evaluate enormous amounts of information, but cannot guarantee a reliable shared reality.
- Constant vigilance, uncertainty, and the ongoing scrutiny of information characterize everyday work.
- Leadership provides direction and makes decisions, even though situational assessments, responsibilities, and political commitments remain ambiguous.
- Leadership must act quickly and credibly without reacting to manipulated information, unnecessarily escalating situations, or creating a state of constant alert.
