

Questions of the Executive

1. To what extent does the use of the technology change the understanding of leadership and decision-making, possibly shifting it from humans toward systems?
2. What risks arise from the use of the technology, and who bears the responsibility for the consequences that result from it?
3. How do we ensure that the use of the technology adequately takes ethical, legal, and social implications (ELSI) into account?
4. How do we address potential tensions among our employees and stakeholders that may arise for social or cultural reasons?

Short Description: Scenario 2

- Technologies are used specifically to increase efficiency and conserve resources, and are embedded in stable, reliable systems.
- Everyday work is characterized by professionalism, a long term orientation, and a calm, well structured atmosphere.
- Leadership consists of combining stability with further development and ensuring clear responsibilities.
- The central challenge lies in reliably managing continuous modernization under sustainability requirements and the pressure of a skilled labor shortage.
