

Questions of the Executive

1. To what extent does the use of the technology change the understanding of leadership and decision-making, possibly shifting it from humans toward systems?
2. What risks arise from the use of the technology, and who bears the responsibility for the consequences that result from it?
3. How do we ensure that the use of the technology adequately takes ethical, legal, and social implications (ELSI) into account?
4. How do we address potential tensions among our employees and stakeholders that may arise for social or cultural reasons?

Short Description: Scenario 3

- Information technologies are used specifically to make internal data, decision paths, and processes fully publicly visible in real time.
- Everyday work is characterized by absolute transparency, a high level of autonomy within the teams, and constant public observation.
- Leadership consists of promoting open communication and enabling bold decisions, even when unfinished thoughts and errors become visible.
- The central challenge lies in keeping the organization agile and capable of acting under constant public scrutiny and criticism evaluated in real time.
