

Questions of the Executive

1. To what extent does the use of the technology change the understanding of leadership and decision-making, possibly shifting it from humans toward systems?
2. What risks arise from the use of the technology, and who bears the responsibility for the consequences that result from it?
3. How do we ensure that the use of the technology adequately takes ethical, legal, and social implications (ELSI) into account?
4. How do we address potential tensions among our employees and stakeholders that may arise for social or cultural reasons?

Short Description: Scenario 4

- Technologies are used specifically to utilize scarce resources more efficiently, control consumption, and keep supplies stable.
- Everyday life is characterized by thriftiness, prioritization, and a high awareness of limitations and dependencies.
- Leadership consists of providing orientation amidst limited resources, setting priorities, and ensuring the ability to act.
- The central challenge lies in managing distribution conflicts, supply risks, and increasing pressure to adapt under conditions of permanent scarcity.
