

Questions of the Executive

1. To what extent does the use of the technology change the understanding of leadership and decision-making, possibly shifting it from humans toward systems?
2. What risks arise from the use of the technology, and who bears the responsibility for the consequences that result from it?
3. How do we ensure that the use of the technology adequately takes ethical, legal, and social implications (ELSI) into account?
4. How do we address potential tensions among our employees and stakeholders that may arise for social or cultural reasons?

Short Description: Scenario 6

- Critical technologies are increasingly provided by external actors and decisively determine military capabilities.
- Everyday work is characterized by uncertainty, geopolitical pressure, and dependence on external technology providers.
- Leadership consists of managing military capabilities and strategically overseeing the associated external dependencies on technology and politics.
- The central challenge lies in securing strategic autonomy even though key capabilities lie outside one's own sphere of influence.
