

## Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Job Title:

## Short Description: Scenario 1

- Automation and AI systems determine work processes, while humans take on tasks that machines cannot reliably cover.
- Everyday work is characterized by permanent adaptation, high pacing, and a tense atmosphere.
- Leadership is highly data driven and consists primarily of flexibly integrating people as resources into the rhythm of the machine system.
- The central challenge lies in providing orientation under extreme pressure for efficiency and change, even though roles, teams, and requirements are constantly shifting.
