

Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Short Description: Scenario 2

- Technologies are used specifically to increase efficiency and conserve resources, and are embedded in stable, reliable systems.
- Everyday work is characterized by professionalism, a long term orientation, and a calm, well structured atmosphere.
- Leadership consists of combining stability with further development and ensuring clear responsibilities.
- The central challenge lies in reliably managing continuous modernization under sustainability requirements and the pressure of a skilled labor shortage.
