

Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Short Description: Scenario 3

- Information technologies are used specifically to make internal data, decision paths, and processes fully publicly visible in real time.
- Everyday work is characterized by absolute transparency, a high level of autonomy within the teams, and constant public observation.
- Leadership consists of promoting open communication and enabling bold decisions, even when unfinished thoughts and errors become visible.
- The central challenge lies in keeping the organization agile and capable of acting under constant public scrutiny and criticism evaluated in real time.
