

Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Short Description: Scenario 4

- Technologies are used specifically to utilize scarce resources more efficiently, control consumption, and keep supplies stable.
- Everyday life is characterized by thriftiness, prioritization, and a high awareness of limitations and dependencies.
- Leadership consists of providing orientation amidst limited resources, setting priorities, and ensuring the ability to act.
- The central challenge lies in managing distribution conflicts, supply risks, and increasing pressure to adapt under conditions of permanent scarcity.
