

Questions of the Executive

1. In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?
2. What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?
3. How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?
4. How does the implementation of the technology alter the dynamics of both internal and external conflicts?

Short Description: Scenario 6

- Critical technologies are increasingly provided by external actors and decisively determine military capabilities.
- Everyday work is characterized by uncertainty, geopolitical pressure, and dependence on external technology providers.
- Leadership consists of managing military capabilities and strategically overseeing the associated external dependencies on technology and politics.
- The central challenge lies in securing strategic autonomy even though key capabilities lie outside one's own sphere of influence.
