

Canvas 02 - Runde: _

Get started

- You are now immersed in your scenario. Please follow the steps on Canvas 02 to continue your game.
- If you wish to start a new round, please take a new Canvas 02 and label it with the corresponding round number.

5. New Technology

Please draw a technology card and read it aloud.

First, discuss the key implications of this technology in your group and ensure that all players develop a shared understanding.

6. Discussion

In the next step, discuss the use of the technology in your company and scenario based on the following questions. Together, develop a consensus that you can later present to your superior. Ensure that at the end of your discussion all four questions have been answered.

Record the conclusions you have reached, as well as the arguments that were decisive in arriving at them on this canvas.

"In which situations does decision-making power shift from humans to technical systems, and in which should it intentionally remain human?"

What risks arise from the use of the technology, and who bears the responsibility for the resulting consequences?

"How do you ensure that the use of the technology is consistent with ethical principles, legal requirements, and organizational values, and where might potential conflicts of interest arise?"

How does the implementation of the technology alter the dynamics of both internal and external conflicts?

7. Reflection

You have now reached the end of this discussion. Please reflect together:

1. What do we take away from this discussion for real decisions in the future?

2. What impact do you anticipate the technology will have on your position within your organization in the future?

3. Which viewpoints and lines of reasoning had the biggest impact on the discussion?

8. Completion

You have reached the end of this round of the game. You may now play another round with a new technology card by starting with a new blank Canvas 02. Your scenario remains the same. The technology card from this round no longer has any relevance for the next round.

Alternatively, you can end the game here and present your results to your superior (= the other teams).
